## Printing Instructions for Nylon Fabrics

Due to the nature of nylon, special care must be taken throughout the decoration process. Here are some tips to effectively decorate our performance products.

### HEAT TRANSFER/SCREEN PRINTING

- Garment temperature must not exceed 310°F or 154°C.
- Use fast fashion/low cure temperature ink to help prevent the need for a higher temperature to cure the ink.

**A test sample run is recommended, especially if you have a large order or if your printer does not specialize in printing on performance fabrics.**
